

# JAI HIND WELDING AND BOILER REPAIR WORKS

Govt. Approved Boiler Repairers and Steam Pipe Fabricators

**THE  
BOILER  
SPECIALISTS**

# ABOUT US

Jai Hind Welding and Boiler Repair Works (JHW) is a leading and highly reliable boiler contractor in India. Founded in the year 1952 by a visionary man, Mr D. T. Hamdulay, to provide services for boiler and steam piping related works, JHW is approved under the Indian Boiler Regulation (IBR) Act 1950. Ever since its inception, JHW continues to witness an exponential growth as boiler repairer, steam pipeline fabricator, and manufacturer of pressure parts of boilers. JHW commands a high reputation and has a very impeccable record of service.

## VISION:

Our vision is to ensure our clients have peace of mind with regards to their boilers.

## MISSION:

Our mission is to deliver brisk and hassle-free boiler solutions, conforming to all required norms.

## CORE VALUES:

The following values are deeply rooted in us and dictates how we work:

- 1. Determination** - We are determined to achieve the desired result in the most efficient way possible.
- 2. Dedication** - We are dedicated to fulfill our mission and achieve our vision.
- 3. Persistence** - We persist, even to extreme levels, to fulfil our commitments and obligations.

# OUR INFRASTRUCTURE

Studding work for bed evaporator tubes

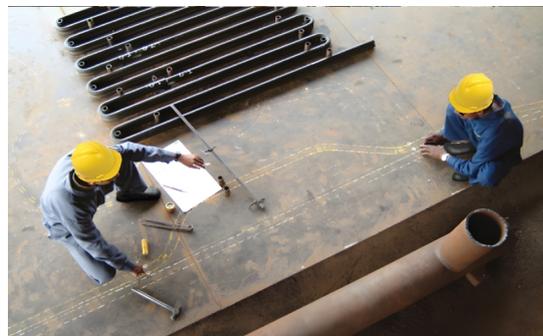

Serpentine bends of economiser coil

Quality Control

Layout checking (Studded bed coil)

Layout making

Bend quality check

100NB CNC tube bending machine

Header drilling

# OUR SERVICES

## 1. Repair and Maintenance

Replacement of all types of pressure parts like smoke tubes, bed coils, economiser coils, etc. Repairing of boiler parts like shell, drum, furnace etc. Overhauling of mountings, fittings, and accessories of boilers.

## 2. Erection and Commissioning

One stop solution for erection and commissioning of complete boiler house covering entire scope like ducting, piping, refractory, insulation, electrical, instrumentation etc. with statutory clearance from IBR.

## 3. Boiler Pipeline

Design, fabrication, and site installation of all types of steam pipeline, pressure reducing station, blowdown pipeline, feedwater pipeline, etc. strictly in accordance with IBR norms.

## 4. Annual Inspection with IBR Formalities

Cleaning and overhauling of boiler along with its mountings, fittings, etc for annual inspection and IBR certification by IBR authority.

## 5. Operation and Maintenance

O&M services for all types of boilers, to ensure optimum boiler performance.

## 6. Boiler Accessories

Supply of boiler accessories like dust collector, wet scrubber, bag filter, air pre-heater, water pre-heater, chimney, etc.

## 7. Boiler Upgradation

Correlate field data with design calculation and undertake turnkey assignments to upgrade existing boiler performance so as to achieve significant enhanced capacity.

## 8. Boiler Consultancy

Experienced team to provide expert consultancy related to boiler services like Remnant Life Assessment (RLA), condition assessment, Short Term Certificate (STC), boiler performance enhancement, etc.

**We serve almost all types of industries like textile, chemical, food, oil, fertilizer, etc.**

# OUR SPECIALIZATION

## 1. Boiler breakdown or shutdown jobs

We have an extensive experience with a specialised team to carry out boiler breakdown or shutdown jobs in an expeditious manner.

In case of breakdown of boilers, we immediately swing into action and tirelessly work round-the-clock to make the boiler operational again in the shortest possible time without compromising on quality.

We are capable of replacing:

- (a) 100 nos. of smoke tubes of package type boiler within 5 days, and
- (b) 100 nos. of studded bed coils of water tube boilers within 3 days.

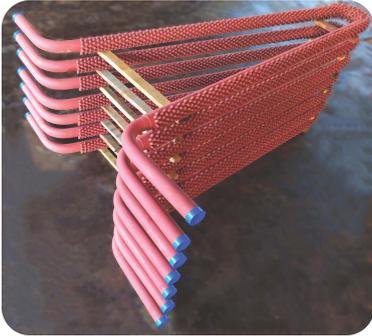

## 2. Reconditioning and installation of boiler

We offer fully reconditioned package type smoke tube boilers adhering to our meticulous and strict reconditioning processes, at amazingly low price to ensure you incredible savings.

With our experience and workmanship we are not only able to provide used reconditioned boilers, but also built-to-order equipments of extremely high quality.

# OUR PRODUCTS

**Studded Bed Coils**

**Super Heater Coils**

**Waterwall Panels**

**Bank Tube Assembly**

**Headers**

**De-Super Heater Assembly**

**Evaporator Coils**

**Economizer Coils**

**Swaged End Tubes**

**High Freq. Spiral Fin Tube Welded Coil**

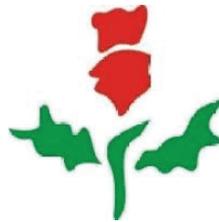

**Short Radius Bend (1D & 0.65D)**

**Panel Assembly**

**... and many more**
